Reliable Data Cable Solutions for Extended Distance Operations

www.wwcables.com.au

In a world driven by seamless connectivity, the right data cable can make all the difference. Whether you're setting up a robust communication network or ensuring uninterrupted data transfer, choosing a cable that meets your needs is crucial.

World Wire Cables offers ACA 008 approved multi-pair **data cables** designed for extended distance balanced pair operations, including EIA RS422, RS485, and RS232. These cables are crafted with precision, featuring 300V stranded tinned copper for superior conductivity and durability. The polypropylene (PP) insulation and PVC 4V-75 sheath provide excellent protection, while the overall screening ensures minimal interference, even in demanding environments.

The coloured pairs with a grey sheath make installation straightforward and organised, saving you time and effort. With low capacitance, these data cables are perfect for applications requiring reliable performance over long distances.

Whether you're upgrading your existing setup or starting from scratch, World Wire Cables' data cables are engineered

to deliver consistent results. Trust in a solution that combines quality, efficiency, and longevity to keep your operations running smoothly.

Choose us for data cables that connect your world with confidence. For more information, visit us at:
