

Security Tool for D365 F&SCM

Business Process & Role-Based Security for D365 F&SCM

DynaTech's **Security Tool for D365** F&SCM is designed to enhance access control and streamline processes, setting a new benchmark for security configuration. With its robust features and automation capabilities, our tool ensures:

Ensure proper allocation of roles, duties, and privileges.

Monitor license usage and menu item counts across roles.

Identify and rectify redundancy or excess permissions.

Features

Comprehensive Security & User Traceability

Gain full visibility over user access activities with real-time tracking and audit-ready reports.

Segregation of Duties (SoD) Conflict Detection

Prevent compliance violations by automatically identifying and resolving SoD conflicts.

Dynamic License & Access Management

Optimize license usage, prevent over-assignments, and reduce unnecessary costs.

Automated Role & User Configuration

Streamline role assignments and bulk updates to minimize administrative workload.

Audit-Ready Reports & Compliance Oversight

Ensure continuous compliance with detailed security logs and customizable reports.

Automation & AD Integration

Prevent compliance violations by automatically identifying and resolving SoD conflicts.

Audit

Maintain compliance with detailed logs of user activities, preconfigured SOD conflicts, and role assignment approvals.

Delegation

Facilitate effective workflow management by suggesting appropriate users for role and workflow delegation.
