

MAVERICK SIMULATION SOLUTIONS LIMITED

Maverick Simulation Solutions is an innovative medical technology company dedicated to advancing healthcare education through realistic simulation solutions. Founded by experts in engineering and medical sciences, we design and manufacture advanced medical simulators that enhance clinical training, improve patient safety, and bridge the gap between classroom learning and real-world medical practice.

About us

The founder of Maverick began his entrepreneurial journey in 2006, becoming a trailblazer in 3D scanning and printing technologies in India. With over two decades of experience in engineering and product development, he shifted focus to the field of medical simulation in 2019, introducing the groundbreaking Anatomage Table to the Indian market.

Many of our simulators are proudly manufactured in India, reflecting our commitment to local production and expertise. We also collaborate with leading technology firms to ensure our products meet and set global standards in medical education and training. Driven by a steadfast commitment to saving lives, we work tirelessly to tackle global health challenges and minimize human errors in patient care, ultimately contributing to improved healthcare outcomes worldwide. Through our initiatives, we aim to empower future healthcare providers with the best tools and training to succeed in their roles.
