

Iran's Export Performance of 2025: The Latest Trade Updates

Iran, a sovereign country in Western Asia, bordered by Armenia to the north and Afghanistan to the east, is a representative and influential economy in the worldwide trade market. [Iran Import Data](#) has reported the increasing share of petrochemical exports as a substantial factor contributing to the hike in the revenue rate. The improved export registration and the strong demand for Iranian agricultural products have resulted in a total valuation of exports from the country worth 62 billion US dollars in 2025.

The specialized export credits, the trade missions, and the international exhibitions have been stabilizing the overall growth rate of the export revenue. Subscribe to Import Globals, the leading Iran Import Export Trade provider, to stay updated with the latest information regarding the export market of the nation via the Iran Trade Data.

GOVERNMENT EFFORTS BOOSTING THE EXPORT TRADE RANK OF IRAN

The export credit guarantees and investment support for Africa are one of the significant initiatives that have reduced the financial risk for Iranian exporters. It has even encouraged expansion into new high-growth regions. The trade diplomacy and strategy agreements boosting non-oil exports have helped the authorities increase non-oil export volumes. It has even diversified the export destinations.

The expansion and incentives in free trade zones have supported the small and medium enterprises as large exporters. With preferential regulatory conditions, the national export exhibition and promotion event has stabilized the bilateral business negotiations.

- Petroleum coke
- Petroleum-based oils
- Ethylene

- Propylene

FUTURE TRADE OUTLOOK OF THE EXPORT MARKET OF IRAN IN 2025

The export economy of Iran will continue to shift away from heavy reliance on crude oil. The exports, such as petrochemicals, metals, and foodstuffs, will support the static growth rate better through the government trade promotion strategy. The 66% year-on-year growth rate for the first nine months of 2025 has reflected the robust trajectory of the country in the upcoming times.

The free trade zones and export incentives will raise the annual exports. The Eurasian Economic Union's collaboration with the agreements launched by Iran's authorities will facilitate the tariff reductions; it will even increase market access.
