

WOKA WALLA

Indigenous Land Management & Workforce Solutions

[About Woka Walla](#)

Woka Walla is a proudly Indigenous-owned enterprise operated through Yorta Yorta Nation Aboriginal Corporation. Based in Shepparton, Victoria, the organisation delivers land management, environmental services, labour hire, workforce solutions, and practical project support across Northern Victoria and Southern New South Wales. Built on Traditional Owner knowledge and a commitment to caring for Country, Woka Walla works with government agencies, councils, commercial organisations, developers, and community groups to deliver reliable project outcomes. The organisation combines cultural understanding with practical capability, creating opportunities for communities while supporting sustainable environmental and economic outcomes across the region.

[Land Management & Environmental Services](#)

Land management is at the core of Woka Walla's operations. The organisation delivers practical environmental services that support biodiversity, sustainability, and responsible land stewardship. Working across rural, public, environmental, and community-focused projects, Woka Walla helps clients achieve long-term environmental outcomes through a combination of traditional knowledge and modern management practices. Services are designed to support healthy landscapes, protect natural resources, and strengthen environmental resilience.

[Natural Resource Management](#)

Woka Walla provides natural resource management services including weed and pest control, revegetation, erosion control, environmental maintenance, and waterway management. These activities support environmental restoration and improve landscape health across regional Victoria and Southern NSW. By working closely with councils, government agencies, and landholders, the organisation helps restore ecosystems, improve biodiversity, and support long-term environmental sustainability.

[Cool Burns & Cultural Burning](#)

Drawing upon Traditional Owner knowledge, Woka Walla delivers culturally informed cool burning programs that support caring for Country. These practices help manage fuel loads, encourage ecosystem regeneration, protect culturally significant landscapes, and improve environmental outcomes. Cultural burning demonstrates how Indigenous knowledge can

work alongside contemporary environmental management to create safer and healthier landscapes for future generations.

Fencing Services

Woka Walla delivers fencing services for agricultural properties, environmental projects, infrastructure works, and community developments. Services include farm boundary fencing, livestock fencing, stock-proof fencing, wildlife exclusion fencing, development site fencing, and flood recovery repairs. The organisation provides practical solutions that help landholders and project managers protect assets, manage livestock, and support environmental objectives.

Minor Earthworks & Landscaping

The organisation undertakes site preparation, drainage installation, trenching, landscaping, and public space improvements for a variety of projects. From infrastructure developments to community facilities and environmental works, Woka Walla provides dependable earthworks and landscaping services tailored to project requirements. Practical expertise and local knowledge ensure projects are completed efficiently and professionally.

Concreting Services

Woka Walla provides concreting services for pathways, footpaths, slabs, hardstand areas, kerb works, and supporting infrastructure. These services contribute to safer, more accessible public spaces and durable community infrastructure. The organisation focuses on quality workmanship and reliable project delivery, helping clients achieve long-lasting results.

GIS & Spatial Services

Accurate information is essential for effective planning and decision-making. Woka Walla offers GIS mapping, spatial analysis, environmental mapping, data collection, reporting, and site planning support. These services help organisations better understand landscapes, manage assets, and support environmental, infrastructure, and land management projects with confidence.

Cultural Advisory Services

Woka Walla supports organisations through cultural advisory services that promote respectful engagement with Country and Traditional Owner knowledge. Services include cultural heritage awareness, project consultation, cultural risk considerations, heritage guidance, and land management advice. These services help clients incorporate cultural perspectives into project planning and delivery.

Project Management & Workforce Solutions

In addition to field services, Woka Walla provides project management and workforce solutions. The organisation supports project planning, contractor coordination, compliance reporting, scheduling, stakeholder engagement, and delivery oversight. Labour hire services connect businesses with skilled personnel across environmental, civil, operational, and administrative roles. Through workforce development and employment pathways, Woka Walla helps strengthen regional communities while meeting workforce demands.
