

JAHANGIR
TUTORIALS

Jahangir Tutorials

Jahangir Tutorials is founded upon a fundamental premise to help every student comprehend the law and commerce subjects without ambiguity and with confidence.

About Us

Our approach to teaching is focused on slow, consistent instruction, concrete examples and a consistent level of support students are able to count on. Through the years our school has become an established learning environment that allows students to ask questions, reviewing concepts and getting ready for their exams without a doubt. Every class is tailored to help students make challenging subjects manageable and each student is given a personal touch. At jahangirtutorials, we continue expanding our mission to make quality CS and CA education accessible, focused, and dependable.
