

MAVERICK SIMULATION SOLUTIONS LIMITED

The founder of Maverick began his entrepreneurial journey in 2006, becoming a trailblazer in 3D scanning and printing technologies in India. With over two decades of experience in engineering and product development, he shifted focus to the field of medical simulation in 2019, introducing the groundbreaking Anatomage Table to the Indian market.

Since then, Maverick has established its own robust research and development capabilities, allowing us to create a diverse portfolio of medical simulators ranging from low-fidelity models for basic training to high-fidelity simulations that replicate real-life medical scenarios. Our dedicated team of over 50 experts is passionate about developing innovative medical training solutions that enhance the skills of healthcare professionals.

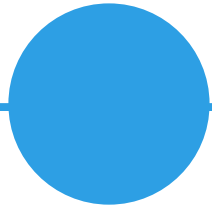

ABOUT OUR COMPANY

MAVERICK SIMULATION SOLUTIONS LIMITED is a pioneering Indian company dedicated to advancing medical education through realistic, hands-on simulation technology. What began with expertise in 3D scanning and printing has evolved into designing and making a broad range of medical simulators from basic training models to high-fidelity systems that mimic real clinical situations. With a strong research and development focus and products proudly made in India, Maverick equips healthcare professionals with practical tools that bridge classroom theory and real-world skills. Driven by innovation and quality, the company strives to improve patient safety and empower learners to practise with confidence.
