# About us

MAVERICK SIMULATION SOLUTIONS LIMITED is a pioneering Indian company dedicated to advancing medical education through realistic, hands-on simulation technology. What began with expertise in 3D scanning and printing has evolved into designing and making a broad range of medical simulators from basic training models to high-fidelity systems that mimic real clinical situations. With a strong research and development focus and products proudly made in India, Maverick equips healthcare professionals with practical tools that bridge classroom theory and real-world skills. Driven by innovation and quality, the company strives to improve patient safety and empower learners to practise with confidence.
