Pendant Light for Dining Table

A WARM CENTREPIECE OVER EVERY MEAL

A dining table earns a fixture of its own. Nix Woods builds solid-wood pendant lights sized to hang low and even over a table, casting a warm line of light across plates and faces instead of a single glaring point overhead.

- Solid walnut and oak beam-style bodies
- Warm 2700K–3000K LED strip built into the frame
- Adjustable drop length to suit ceiling height
- Sized for 4, 6 and 8-seat tables

Scandinavian Pendant Light

CLEAN LINES, NATURAL MATERIAL

Scandinavian design favours natural material over ornament, and that's exactly where solid-wood pendant lighting fits. Nix Woods keeps every silhouette simple — a frame, a glow, and a wood grain left to speak for itself.

- Minimalist frame silhouettes, no unnecessary detail
- Natural walnut and oak finishes, no paint or veneer
- Soft, even light rather than a harsh single bulb
- Fits Nordic, modern and mid-century interiors alike

Wood Hanging Light

HANDCRAFTED, ROOM BY ROOM

A wood hanging light does more than illuminate a corner — it anchors it. Hung beside a reading chair or over a side table, the solid-wood body reads as a piece of furniture that happens to glow.

- Hand-sanded and oiled solid-wood bodies
- Engraved NixWoods nameplate on select models
- Dimmable warm-white LED, no bulb changes needed
- Pairs naturally with plants, rattan and wood furniture

Wooden Hanging Lights

FOR DESKS, HALLWAYS & READING NOOKS

Not every space needs a wide fixture. Nix Woods' slim wooden hanging lights work as a single drop pendant over a desk or entryway, adding a warm vertical accent without crowding a small footprint.

- Slim single-drop and multi-drop configurations
- Compact wood housing with brass or black hardware
- Ideal for desks, hallways and reading corners
- Easy ceiling-hook installation, cord length included
