

Everyday skincare, made simple

About Dermacan

Dermacan is a skincare brand from Lucknow that keeps its range short and useful. The shelf at dermacan.in covers the basics of a daily routine: a face wash with salicylic, glycolic and lactic acid, a gel sunscreen, a non-greasy moisturiser, a blemish repair serum and sheet masks for the days your skin looks tired. Every product is sold in a 60 ml tube or a small pack, so trying one does not mean committing to a big bottle.

- Face wash, serum, moisturiser and sunscreen
- Sheet masks for a quick glow
- Order online at www.dermacan.in

Introduction

Everyday skincare, made simple

Keyword 1 of 3

moisturiser for pigmentation

Dark spots and uneven tone come from more than one cause, and a moisturiser alone will not erase them. What it does is keep the skin barrier calm. Dry, irritated skin looks patchier and holds on to acne marks longer. Dermacan Ecosoft is a light lotion with shea butter, cocoa butter and avocado oil, made non-greasy and non-comedogenic so oily and acne-prone skin can use it too. Apply it after cleansing, morning and night, and put sunscreen over it in the day. For stubborn marks, layer the Blemish Repair Serum underneath.

- **Non-comedogenic, non-greasy finish**
- **Shea butter, cocoa butter and avocado oil**
- **Pairs with sunscreen and a repair serum**

Keyword 2 of 3

bright skin face mask

A sheet mask will not change your skin overnight, but on a dull, tired day the difference shows. Glotop Skin Glow face mask uses kakadu plum extract, a fruit known for its vitamin C, together with niacinamide, an ingredient people often reach for when tone looks uneven. Each pack holds two single-use sheets, so you can keep one for a busy week and use the other before an event. Cleanse first, lay the sheet flat on your face, then press in whatever serum is left and finish with moisturiser.

- **Kakadu plum extract with niacinamide**
- **Two single-use sheet masks in every pack**
- **Follow with moisturiser and sunscreen**

Everyday skincare, made simple

sunscreen for women

Most women skip sunscreen for the same three reasons: it feels heavy, it sits greasy under makeup, or it makes them break out. A gel texture answers the first two. Dermacan Hydro-UV is a lightweight sunscreen gel with UVA/UVB protection and a PA+++ rating, built on micronized zinc oxide, avobenzone and sulisobenzonate. Use it as the last skincare step every morning, even on cloudy days, and reapply if you are outdoors for hours. It is also the step that stops dark spots from coming back.

- **Broad-spectrum UVA/UVB, PA+++**
- **Micronized zinc oxide, avobenzone, sulisobenzonate**
- **Light gel that spreads easily**
