

Slim. Strong. Made in Jaipur.

Elite Window Factory

We are a Jaipur-based maker of aluminium windows and doors. Every system is cut, assembled and finished in our own factory to your exact measurements, so what reaches your site fits the opening and looks the way you pictured it.

Slim. Strong. Made in Jaipur.

Minimalist Slimline Aluminium Sliding Doors

Minimalist slimline sliding doors keep the frame out of the way so the view can do the talking. Narrow aluminium sections carry big sheets of glass, which pulls daylight deep into the room and makes the garden feel like part of the floor plan.

Thin sightlines

Less metal, more glass, in every opening.

Smooth glide

Quality rollers move heavy panels with one hand.

Made for Jaipur weather

Powder-coated finish stands up to heat, dust and monsoon.

Slim Aluminium Sliding Window Systems

Slim. Strong. Made in Jaipur.

Slim aluminium **sliding window systems** suit rooms where space is tight and light matters. The sash moves sideways instead of swinging out, so nothing blocks the balcony, the bed or the curtain, and the narrow frame still opens up a wide, clear view.

Saves floor and wall space

No swing arc, so furniture can sit right beside it.

Ventilation you control

Open it a little for a breeze or fully for fresh air.

Easy upkeep

Aluminium does not rot or swell. A wipe is enough.

Modern Slim Profile Aluminium Systems

Modern slim profile aluminium is what makes a clean, current look possible. The metal is strong enough to stay thin without flexing, so the doors and windows across a house share the same sharp lines from the living room to the terrace.

Strength in thin sections

Slim does not mean weak. Frames stay rigid under load.

Finish to match your design

Choose a colour that sits well with your walls.

Built to your size

Cut and fabricated at our factory for a snug fit.

Thank You

Let's design your view together.
